

Docket No. AUS000085US1

ABSTRACT OF THE DISCLOSURE

METHOD FOR ABSTRACTING A PKI KEYSTORE ON TOP OF CDSA

5

A cryptographic system for use in a data processing system. The system includes a security layer and a plurality of cryptographic routines, wherein the plurality of cryptographic routines are accessed through 10 the security layer. Also included is a keystore and a keystore application program interface layer coupled to the security layer. The keystore application program interface layer receives a call from an application to perform a cryptographic operation, identifies a routine, 15 calls the routine to perform the cryptographic operation, receives a result from the routine, and returns the result to the application.
